OIL PROSPECTS AT MANY ISLAND LAKE SAID TO BE GOOD

Because of its wet gas the well of the Community Oil Wells, Limited, in the Many Island Lake oil field, is a commercial producer as it stands today," stated Roy Lebkicher, the geologist, at the annual meeting of the shareholders of the company in Medicine Hat. "Moreover, the wet gas certainly indicates that there is a body of oil not far away," he added.

His explorations have convinced Mr. Lebkicher that an anticline exists in the Many Island Lake field, and he is very optimistic over the prospects for developing a large oil field. "And even if we do not get oil in this well the field looks just as good," he declared.

More money is needed to complete the well, and the optimism evident at the meeting indicated that it will be forthcoming. It was unanimously decided that the 400 shares of \$100 each in the capital of the company be subdivided into 40,000 shares of \$1 each and that the capital of the company be increased to \$100,000 by the creation and issue of 60,000 shares at \$1 each.

Mr. Lebkicher expressed the belief that the top of the Dakotas would be reached at a depth between 2,500 and 2,700 feet, and, from recent indications in the well, the top of the Dakotas would not be far below 2,500 ft.

"I have good hopes that we shall get oil in the Dakotas," he said.

As regards both pressure and volume, there was in the Many Island Lake district what was probably one of the largest gas fields in Alberta, declared Mr. Lebkicher. He had seen gasoline taken from the wet gas by Mr. Leo Wilson, president of the Sarnia Oil company. The well was a commercial proposition as it stands today, and the wet gas certainly indicated that there is a body of oil not far away.

That if the stories of rotary drills going through oil without the drillers knowing it were true, the cause was carelessness, declared the geologist. He assured the shareholders that there was no danger of that happening in the Community well. By the feel of the tools and the sound at the top of the well—the drill pipe acts much like a telegraph line—the drillers were able to tell what formation the bit was in. Moreover, he himself was constantly at the well and tested the cuttings every few feet. And when good indications are found a core is taken from the well and tested.

LOOKS OVER SITES FOR OIL REFINERY IN LETHBRIDGE

An oil refinery, drawing its crude from the Kevin-Sunburst field, to cost \$150,000 to \$200,000, and employing a fairly large force of workmen and experts steadily, is contemplated in Lethbridge by Vancouver capitalists.

J. C. Williamson, of Vancouver, an experienced refinery man, is in the city looking over the field, and to the Herald said Thursday that he was favorably impressed with the location. "I shall submit my report to my Vancouver associates, and if they decide to build, you will see a start made in thirty days," he said.

Continuing, Mr. Williamson said: "I have already gotten a line on a supply of crude in the north (Montana) field. Then, too, we are interested in developments on this side, which if successful will mean a closer supply. I am very enthusiastic over the new border field. You can rest assured, there is plenty of capital in Vancouver ready to invest if the field develops as we are hopeful that it will."

While in the city, Mr. Williamson will look over a number of sites, and will also investigate water, light, railway facilities, etc., on which to base his report. He said if his associates do build, the refinery will be a strictly up-to-date plant, capable of being enlarged as the business grows.

"If pulling this tooth hurts you," said a local dentist to a patient, "don't blame me, blame your nerves." "And if I hit you on the nose when it is over," growled the patient, "don't blame me, but blame my tooth."

MONTANA Oil News

S. O. & G. STOCK SOARS WHEN BROKERS ESTIMATE IT WORTH \$15 PER SHARE

A sudden jump in the market price of Sunburst Oil & Gas company stock marketed the past week and as a result the quoted price is today \$1 higher than one week ago today, according to H. B. Lake & Co., of Great Falls, and Lauzier-Walcott of Butte, brokers.

The printed assertion that Sunburst Oil & Gas stock is worth \$15 on the basis of present properties, printed in the Great Falls Leader's annual oil edition, started the upward race and today there is but little stock to be had at any price. The last transactions were at \$13. Par value \$1.

The new Western Petroleum company well is said to have proved up area giving \$2,000,000 added valuation to Sunburst Oil & Gas company properties. When Potlatch well came in, again extending the field eastward, between \$2,000,000 and \$3,000,000 was added to S. O. & G. property valuations.

This added the \$5,000,000 valuation placed on the company's other properties, proven by Sunburst discovery well, makes a total valuation of approximately \$10,000,000, conservatively estimated.

The Sunburst Oil & Gas company is capitalized at \$385,000 fully subscribed. This would make a share of par value of \$1 worth \$25. The Butte Brokers estimated the value at \$15.

ANGLO-INDIAN OILS

Notice of the incorporation of the Anglo-Indian Oils Corporation, Ltd., of Calgary, with a Dominion charter, was announced from Ottawa last week by J. F. M. Moodie, G. H. Hutton, Dr. W. A. Piper, Lucy C. Moodie and George Bell are the incorporators.

3-IN-1 STARTS DRILLING SOON

The Diamond Drill and Contracting company of Spokane, who have the drilling contract from the Three-in-One-Barkdale well to the north of the Potlatch State No. 2 well that came in last week. The well is only a few feet from the same horizon that produces at the Potlatch well and the sand will soon be encountered upon resumption of drilling. The Three-in-One company controls about 1200 acres that were affected by the Potlatch production.

At the Stockholders' meeting recently officers were succeeded by a newly elected board. G. C. Hoyt was succeeded as president by Garfield Davis of Spokane. The rest of the new board of directors are L. W. Hanson of Kalsipell, Erick Ryerson of Troy, Idaho, J. W. Watson, manager of the Idaho Fire Brick company of Troy, Idaho, and Herman Sandquist, also of Troy. Messrs. Davis, Hanson and Sandquist will have their headquarters in the present offices of the Three-in-One company. Mr. Hoyt will be retained by the Three-in-One company as counsel. —Montana Courier.

Baker No. 3 should be in production next week. It is now at 1350 feet. It offsets the Mid-Northern Howling trend in 9-35-2W. Mid-Northern has spudded in its No. 2 Howling, offsetting the Sunburst Swears No. 1. Homestake Exploration company's PETERS well, now at 1240, due for completion next week. It offsets the Hogan producer in 22-35-2W. Hogan is drilling at 250 on his No. 5, while California company is drilling an offset to the No. 5, having 250 feet of hole.

California company's McGee well is down 250 feet. Ohio Oil has completed its derrick on the Sunburst-Emmert in 15-35-2W.

MUTUAL WILL START ON DRILLING SOON

Drilling is to be resumed very soon at the Mutual well at Pigeon Lake, where work was suspended during the cold weather. When the drillers stopped work the bit was down about 700 feet and in lime shale formation. No predictions are being made by the company officials as to when they expect to strike the oil sand, but it is known that they have the benefit of about 800 feet of surface evocion which glacier action sliced off that particular portion of Alberta.

CANADIAN NATIONAL RYS WILL OPERATE NEW TYPE OBSERVATION CAR THROUGH ROCKIES THIS SUMMER

Canada has some of the most magnificent mountain scenery in the world, as anyone who has travelled through the Northern Canadian Rockies knows. The scenery is so varied, so full of surprises, that if the traveller gives his car his attention to one side of the car he is almost certain to be missing something very wonderful on the other side.

For years transcontinental railways in America have tried out various types of observation cars through the mountains, the objective being to give their patrons the best possible view of the scenery. Some of them have been simply open platform cars, with no protection from the sun or inclement weather.

Car builders have been vying with one another in the construction of these cars to provide the finest observation facilities along with the maximum of comfort. At last the Canadian National Railway Shops at Leaside, Toronto, have turned out a car which has all the requisites, and will be placed in operation on Train 1 and 2 (Continental Limited) during period May 15th to September 30th, this year.

This car might almost be described as a sun-room on wheels, in view of the large percentage of glass used in its construction. It is regulation size, with a closed-in section 44 feet long and a spacious open compartment at each end and where passengers may enjoy the open air. The interior of the car has sixteen large windows on each side running from the seat arm rests to the ceiling. These windows are 4 ft. 5 in. high by 28 in. wide, having two panes of glass 24 in. by 24 in. one above the other. There are also two of these windows at each end of the car, one at each side of the door leading out onto the platform.

The seats are arranged transversely on each side of a centre aisle, as in an ordinary car, there being sixteen double seats on each side, providing seating capacity for sixty-four passengers. The platforms provide capacity for thirty-six additional persons. The entire car framing is of steel, with the interior finished British Columbia cedar, stained mahogany. The interior is equipped with the most up-to-date ventilators, electric light and shades.

One of these new cars was exhibited at Toronto Exhibition last year for the first time, and 150,000 people inspected the car during the fair. It was very favorably commented upon. The car in many ways is an innovation, and marks another advance move by our National Lines.

These cars are to be used on the Mountain Division of the Canadian National Railways, and will enable travellers to view the majestic scenery on both sides of the car with the utmost ease and comfort.

The Editor.

WHAT THE U. S. FARMER HAS TO CONTEND WITH

Isn't it the United States that the song tells us is the "land of hope and glory"? It may be that in song, but in reality—well, ask an American farmer. His answer won't be in any cheerful song but in a mournful dirge. How could he sing when he has to put up with this:

One of Senator Brookhart's exhibits the other day was a cheque for one dollar and thirty cents received by N. P. Nelson of Leal, North Dakota, in full payment for a car of potatoes shipped by him to Minneapolis, and there sold for three hundred and thirty-six dollars. Handling charges and commissions of various kinds absorbed three hundred and thirty-four dollars and seventy-five cents, but the freight alone was hundred and eighty dollars and sixty cents.

Once in a while we hear that things are much better across the line, but the Iowa Senator's exhibit tells a tale that is worse than anything heard of in Canada. When things are not going right at home, far away lands attract, but why should any farmer run away from Canada to better his condition under burdens like those quoted by Senator Brookhart? Our Canadian farmers can't get a good deal of cheer by acquainting themselves with what the farmers across the line have to put up with.—Lethbridge Herald.

Provincial News

ALBERTA CATTLE FOR BRITAIN

A trainload of steers will be sent to the British market immediately the embargo is removed at Hague. Hon. Geo. Hooley, minister of agriculture, in a statement issued during the past week to the newspapers. The statement is as follows:

"In pursuit of the policy announced by the government some time ago the question of marketing of all farm products would be one of the principle policies in the future, the department of agriculture purposes to ship a train load of steers to the old country immediately the regulations covering the removal of the embargo become operative, that is, on the first of April.

"Approximately 242 head of steers are being fed at the various farms and institutions of the government in the province. From these will be selected all the animals that are fit for the British market. We will endeavour to get stockmen in the province, who are feeding large bunches of steers to send a sufficiently additional quantity to make up the train load.

"The purpose of the department is to ship this train load of steers on a co-operative basis under conditions exactly similar to those which can, and unquestionably will be followed by other people. We consider this initial trainload of cattle will assist in setting the type, cost, regulations, etc., which will have to be met by those who wish to avail themselves of this market in the future, as well as illustrating the possibilities of this system of marketing."

SEED GRAIN SUPPLY

There is sufficient wheat and oats in the province to supply the demand for seed this spring, according to information given the department of agriculture, says Hon. Geo. Hooley, minister of agriculture, in a statement issued to the newspapers this week. The statement is as follows:

"On Friday last Mr. Craig, deputy minister of agriculture, at my request went to Calgary and interviewed the Calgary Grain Exchange. At this meeting, most of the grain companies and commission men were represented. He took up with them the matter of the supply of seed grain for farmers and was advised that in their opinion the various companies had sufficient wheat and oats to satisfy the probable demand.

"It developed that a number of these companies were getting anxious about their stocks, as very few seed orders are coming in, and they feel that unless orders are placed at an early date, they will be compelled to sell to the mills or ship the grain out of the province. It was suggested that some local organization, preferably the U. F. A. or municipal council, should undertake to consolidate the orders of farmers at local points and order from the grain companies in carload lots, thus saving the less than carload rate on small lots.

Mr. Craig was also informed that all of the grain companies in the province have some seed for sale, a considerable amount of which is in steel elevators throughout the province.

"He was also advised that it was thought in certain districts, the farmers were still of the opinion that some measure of relief in regard to seed grain will be extended by the government, and are consequently waiting to see what will be done."

"The department finds that the above statement is substantially concurred in by all grain men in different parts of the province.

"The intention of the department under these conditions is to circulate all U. F. A. locals, municipal councils and other organized bodies in the rural parts of the province, informing them as the available supply of seed grain, and suggesting the co-operation of the people in different parts to secure carload lots, at the same time informing them that the government will not guarantee or take any part in the financing or the securing of seed grain, as announced by the premier some time ago."

U. F. W. A. MEETING

The next meeting will be held at the home of Mrs. Hardy, Saturday, April 7th.

The Times is in receipt of a speech delivered by H. E. Spencer, M. P. at Ottawa which we have to hold over until next week.

DISCOVERY WELL AT FORT NORMAN YIELDS 75 BARRELS A DAY

Ronald McKinnon, Imperial Oil official in charge of the transport to Fort Norman, reached Edmonton Friday night from the oil wells at Fort Norman, having made the overland trip by dog team.

There is nothing much to report from the wells. Considerable progress has been made during the season with the new wells in the Norman area, but none of them were completed.

The original discovery well remains in the same condition as to production, yielding about 75 barrels per day.

ALBERTA SOUTHERN EXPECTED TO BE 40 BARREL WELL

Indications of the Alberta Southern oil well, thirty-five miles south of Calgary, becoming a forty-barrel well, were reported in Calgary following operations yesterday morning when the well was blown in an effort to increase its productivity. The Southern Alberta well, in the same field, was blown Monday afternoon, and it was reported that gas was flowing from the well for the first time in many years.

RUSSELL LOVE SPEAKS TO STUDENTS' UNION AT EDMONTON

At the regular semi-monthly meeting held on Friday, March 16th, the students' union of Victoria High School was favored with an excellent address by Russell Love, M.L.A., who is the honorary president of the union and also a former graduate of Victoria.

Mr. Love stated that the High School students should try to avoid falling into habits which would designate them as "extremists." The speaker requested the students to spend a few minutes in self-analysis and to listen to the best advice which he as a V.U. graduate of '12 had to offer. The several extremities types found among students were:

First, the bookworm—one who applies himself to closely to the printed page, spending all his hours in study to the exclusion of healthful recreation and social intercourse. This type, worthy in purpose and small in number, should take heed lest a neglected physique might ultimately defeat his purpose and place him under the care of a physician.

Second, the athlete—strong of heart and limb who dearly loves the contest in which brawn and muscle decide the issue. Of over-development physically there was no danger but a high school stands for development of habits of thinking along academic lines. When the desire to participate in games becomes an obsession it is time to call a halt since the development of a professional athlete is not a recognized part of any high school course. The speaker declared that it is essential that all athletes should be required to attain a satisfactory academic standard as a condition for participation in inter-school contest and he was pleased to note that the Victoria organization had already adopted an academic rule for participation in inter-collegiate games similar to the rules now in effect in the universities.

Third, the sissy—one who disdains participation in games, spends much time in matters of dress, and prefers to seek companionship with those of the opposite sex. This type always afforded considerable amusement for his fellow students who often succeed in making him over into a regular fellow.

Fourth, the student who feels he is being "sent" to school and who thinks his present quota of knowledge is quite sufficient. If this feeling permeates his whole being, it is better for this student to stop school, and go to work.

As opposed to the extremist types we have the real student or regular student type to which it is much better to belong. The real student is one who realizes that the acquisition of knowledge is a pure necessity for anyone possessing an ambition to make his mark in the world today, who finds real pleasure in work well done, and who does not forget that health is a first requirement.

At the conclusion of the address a hearty vote of appreciation was tendered the speaker by Gus Koerman, president of the students' union and the prolonged applause of the students indicated that the message from this honorary president had been well received.—Edmonton Bulletin.

ALBERTA WEEKLY MARKET REVIEW

CATTLE

BEEF—Calgary receipts very light up to yesterday when some good steers and a very few choice heifers offered. Choice heavy and light, steers \$5@6; good \$4@4.50; medium \$3@3.75 1-2; common \$2.25@3. Choice Cows \$3.25@3.75, with tops at \$4.25; good \$2.50@3.75; medium \$2@2.50; common \$1.50@2; canners \$1@1.75. Choice heifers \$4@4.25, with odd tops up to \$5.50; good \$2.50@3.75. Not many bulls offered, tops at \$2.25; medium \$1.25@2. Choice veal scarce, most good ones around \$4, with tops probably \$5; common \$2@3.50.

FEEDERS, STOCKERS—Good feeders around \$4.50 and range down to \$3.50; stocker steers \$3.75. Stock heifers \$2@3; stock cows \$1.50@2.50; not much trading in breeding stock.

BEEF—Prices at Edmonton have been holding steady on the choice beef and in between steers have been rather slow. Choice heavy and light steers \$5@5.50; good \$4@4.50; medium \$3.50@4; common \$2.50@3. Choice fat cows \$3.50@4; good \$3.50; medium \$2.50@3.25; common \$1.25@2.25; canners \$1.25@1.75. Choice heifers \$3.25@4.25; good \$3@3.50. Bulls have been steady with a few tops bringing \$2.50; medium and common \$1.25@2. Calves \$6@7, with a few tops at \$8; common heavy \$2.50@3.50.

FEEDERS, STOCKERS—Good feeders are going at \$4.25 and plain ones down to \$3; stocker steers \$2.50@4. Stock heifers \$1.50@2.75; stock cows are not in demand and hard to move at \$1.25@2.25.

HOGS

Prices at Calgary steadily declining since last week. Last Friday, \$8.75; Wednesday, \$8.25@8.50; today's price \$8@8.25.

Edmonton prices last week-end were holding at \$8.75@8.85; by Tuesday they had dropped to \$8.25@8.50; Wednesday the bulk of the thick smooths made \$8@8.25, with SHEEP

Receipts for past week light at Calan extra two bits on some long haul hairy; one bunch of lambs at \$11.25; wethers around \$8@9; ewes from \$7 down according to quality.

Edmonton receipts of sheep very light; nominally quote lambs at \$9.50@10.50; yearlings \$7@8; ewes \$4@6.

GRAIN

European buying so far as this continent is concerned is not heavy and reports from Liverpool indicate they are getting what they want from other countries at a lower price. There are still optimists who look for higher prices, but it requires a lot of enthusiasm to be able to see it at present.

BUTTER—BUTTERFAT

CREAMERY BUTTER—Local prices unchanged, with 45c@50c quoted for wto grades of cartons; outside prices weaker and ball shipments, basis specials, down to \$15@16 1-2.

DAIRY BUTTER—Fancy table in demand and somewhat scarce, market dealers paying 30c@32c; not much lower grade stuff offered and very little demand. BUTTERFAT—prices unchanged, at basis of 43c for specials; production not showing much increase yet.

FARM KILLED MEATS

HOGS—lightweights down to 10c@11c; heavy unchanged at 7c@8c; mutton and lamb unchanged 14c@20c; veal 5c@7c.

POTATOES

very slow; general price on Calgary deliveries \$18, with range of \$15@20 according to quality.

EASTER SUNDAY

A legend has come down the centuries that when Jesus rose from the grave on Easter morning and walked out into Joseph's garden, wherever his foot pressed the earth, white lilies rose in fragrant beauty. The legend symbolizes a great truth, for wherever Jesus has gone on the earth, joy and hope have sprung up in the human heart, glasses have supplanted sorrow and life has risen out of death.

You are especially invited to church Sunday, April 1st to join with us in commemorating this most wonderful event of history.

Special Easter music by the choir. Rev. Geo. H. Elliott, Pastor.

Great Benefits Will Follow Plan Evolved For Interesting British Youths In Canada

A direct stimulus to British-Canadian immigration, particularly in turning the minds of England's youth, agriculturally inclined, towards farming opportunities in Canada, is contained in the announcement that Mr. E. W. Beatty, President of the Canadian Pacific Railway, is awarding a full summer course at the agricultural schools of Alberta to the four prize winners of the Young Farmers' Clubs of Great Britain. Few schemes, so far devised, with an encouragement of desirable immigration in view, are calculated to have the permanent and lasting effect of this one, with the best and most accurate knowledge of farming conditions in the Canadian West implanted by Canada's foremost agricultural experts in youthful minds cultivated to assimilate it, and capable of disseminating their impressions among the youth of Great Britain.

The London Daily Mail was responsible for the movement known as "The Young Farmers' Clubs of Great Britain." Small organizations were formed in farming communities of the British Isles and some particular or specialized line of farming taken up by its members, the result being Calf Clubs, Pig Clubs, Poultry Clubs, Bee Clubs, Rabbit Clubs, etc. For a long while there has been a similar successful organization in the United States which each year offers a prize for a trip to Europe to six members of the prize-winning club in the country. A like movement initiated in Canada, which it has not moved along with the same enthusiasm, has nevertheless shown considerable progress in certain localities. These organizations in Saskatchewan increased their membership from 460 in 1913 to 30,000 in 1921, whilst in the same time, in the province of Manitoba, the movement has developed from an initial 7 clubs to 240 clubs with 1,500 branch clubs and a total membership of 35,000.

There has been considerable association and interchange of visits between these boy organizations of the United States and Great Britain which has brought the operations of each to a high pitch of enthusiasm and done much to effect a mutual understanding in agricultural matters between the two countries. The London Daily Mail conceived the idea of promoting the same spirit of emulation and competition and giving the youthful students of agriculture in Great Britain a more comprehensive understanding of overseas farming conditions by arranging an exchange between the agricultural students of the Motherland and the Dominion. They approached the President of the Canadian Pacific Railway, with the result that he authorized the visit of the delegation of four young English farmers to Canada to take the summer agricultural courses in Alberta, all their expenses being defrayed.

The four selected boys will arrive in Canada early enough to commence their summer course at the Alberta agricultural schools in May. They will be given as thorough and comprehensive an impression of Western Canadian agricultural conditions as possible in the time, visiting different areas and such agricultural fairs and exhibitions as offer. They will return to England in the fall, where arrangements have been made for them to write up their experiences in the agricultural press of the British Isles. The benefits which may follow in the wake of this scheme are manifold. No phase of Canadian immigration has, in

the past, produced such excellent results as that of young boys from England who have grown up with the land and rapidly absorbed its ideas and ideals. Could the settlement be induced of those with expert agricultural knowledge and experience in their formative years, a tide of very valuable colonists might set in. For the main part agricultural students in the British Isles are farmers' sons, and this dissemination of authentic information on Western Canadian conditions in a class Canada has always considered most eminently desirable as settlers, cannot but be productive of satisfactory results.

Other developments should result from the stimulation of mutual interest in agriculture in the two countries. There is some possibility of the award being made an annual one, and it is confidently hoped that some arrangements may be made to have representatives of the Canadian Young Farmers' Clubs visiting England every year. The visit of young British agriculturists should stimulate a desirable immigration movement, whereas a complementary movement of Canadian youthful farmers overseas, in addition to furthering agricultural knowledge, should develop a clearer understanding of the British and European markets, to which in the future Canada must look to an ever-increasing extent for the disposal of the products of her farms.

Many Uses For Sawdust

It is Found To Be a Most Useful Material For Many Purposes

The old trade could hardly do without sawdust. Thousands of dolls are stuffed with it each year.

It is the best thing there is for packing oranges for export, and chilled eggplant is sometimes used in preference to ice for packing fish.

Sawdust makes a splendid manure, especially for young trees. Dug into the garden it will enrich the soil amazingly in much the same way that pine needles make excellent mould.

Sawdust is much used in the building trade. Rammed in between hollow walls, it makes a first-class sound deadener. It is also used in the walls of cold storage rooms to prevent the passage of heat from outside to the store room.

As a cleansing agent, sawdust stands very high. It is used for spreading on floors of first-class shops, while damp sawdust, if swept up with dust, will prevent the dust blowing about.

The sawdust of mahogany wood is used for smoking fish by burning it slowly when damp.

Woodstove is sawdust mixed with magnesia cement compressed under enormous pressure. This woodstove is very like ordinary wood, save that it has no grain. It is made in planks which can be cut with a saw and planed, and has the advantage of not being inflammable. Bricks are made of sawdust by mixing it with mineral substances and subjecting it to great pressure.

The army uses sawdust extensively for the cavalry riding schools. Mixed with tan it makes an ideal floor for the horses' hoofs. While sawdust mixed with tar and pressed into briquettes makes an excellent substitute for coal to feed the open fireplaces in the home.

A Record in Construction

What is believed to be a record in the construction of a paper mill has been achieved by Westminster Paper Mills, Ltd., New Westminster, B.C. Erection of this plant was started on July 8, 1922, and at 4 p.m., on December, 1922, the first paper was produced. The company's product will be made from pulp made in British Columbia, produced by the Whalen Pulp and Paper Mills.

And many a man's race prejudice is due to his having bet on the wrong horse.

Immigration from U.S. Promises to be Heavy this Year

(By G. C. Porter of Winnipeg)

Chicago.—Measured by every circumstance familiar to the government immigration agents and representatives of Canadian railways in this section 1923 promises to be a good year for the movement of settlers from the States to Canada. All insist that the inquiries during the winter and especially for the past six months are much more numerous than for the same period a year ago.

C. J. Broughton, in charge of the Chicago office, and this section for the Dominion Government, the dean of the staff operating in the United States, told me that his personal callers and mail inquiries have been much in excess of other years this winter. The day I called he had just completed all details and issued certificates for a family of nine that was leaving for a point forty miles north of Regina. This man is carrying a car of equipment for twelve hundred and eighty acres he has purchased there outright and twelve thousand dollars in cash. He sold his farm in Illinois and is taking his entire fortune with four stalwart sons to Canada.

Cases of this sort are not unusual. In Broughton's office last year he issued certificates to 389 families going into the prairies and during his twenty odd years in the service his records will show that he has sent some fifty thousand people over the line. He is the type that makes and holds friends easily and hundreds of those he has sent northward in these years drop in on him every winter while visiting their former homes.

In this class is Rev. David Eisenbeis, a minister of the Dundard faith who sold his large holdings in Nebraska some time ago and after looking all over the United States and Canada for a farm investment, purchased a thousand acres in the Gleichen, Alberta, district. Later he was in Mr. Broughton's office and told him that he was hailed out that fall but in spite of his grain averaged twenty-five bushels to the acre.

When I was in Broughton's office just a year ago he was completing arrangements to send an Illinois farmer and his family to a point near Arnaud, Man., between Winnipeg and Emerson. This winter, this gentleman, a Mr. Curtis, dropped in to see Broughton and told that on two hundred and fifty acres last fall which he had dropped near Arnaud, he had marketed approximately 5,000 bushels of wheat.

Average Value of Farm Land

Comparative Values of Lands for the Different Provinces

The average value of the occupied farm lands of Canada, which includes both improved and unimproved land, together with dwelling houses, barns, stables and other farm buildings, is returned as \$14 per acre, as compared with \$40 in 1921, \$48 in 1920, \$46 in 1919, \$41 in 1918, \$38 in 1917, \$36 in 1916 and \$35 in 1915. By provinces, the value for 1922 is highest in British Columbia, viz., \$120. In the other provinces the average values of farm lands per acre are reported as follows: Ontario, \$64; Quebec, \$58; Prince Edward Island, \$46; Nova Scotia, \$34; New Brunswick and Manitoba, \$32; Saskatchewan, \$28; and Alberta, \$24. The average values in 1922 of orchards and fruit lands, including buildings, etc., in the fruit growing districts of Nova Scotia, Ontario and British Columbia are estimated as follows: Nova Scotia, \$93; Ontario, \$127; British Columbia, \$220.

Commission Will Not Operate

Seed Grain Not to be Handled This Season

Hon. W. R. Motherwell, Minister of Agriculture, announced that the Dominion Government seed purchasing commission will not operate in the purchasing and distribution of seed grain this year.

Since the establishment of the seed purchasing commission under the Dominion Seed Branch in 1916, for the purpose of supplying seed grain at approximate cost to farmers in localities having complete or partial crop failure, steady progress has been made. In the development of the trade in standard grades of seed grain, looking to the ultimate discontinuance of the operation of the seed purchasing commission, at least as a Government organization.

Seed grain will be required in some districts of Northern and Central Alberta this year, but it is believed this can be obtained locally or through private companies to as good or better advantage than through the seed purchasing commission.

Canadian Cattle In Demand Overseas

Commissioner of Agriculture for Canada Making Preliminary Arrangements

The Commissioner of Agriculture for Canada, Mr. Duncan Marshall, who is at present in England, making preliminary arrangements for the export of Canadian store cattle, says that a keen demand for such cattle exists in that country at the present time. Parties have interviewed him from Glasgow, Bristol, Leith, Newcastle-on-Tyne, Salford and Dundee, all anxious to have shipments made to their respective ports. The National Farmers' Union, formerly opposed to the removal of the embargo, appears to have completely reversed its attitude. Its members are now anxious to have consignments made direct to them, in order that commission charges may be avoided. A delegation of Scottish farmers told Mr. Marshall that they wanted Canadian cattle early in the spring to be fed on large stocks of turnips and mangeworls that were still on hand.

A New Make of Cheese

A Product of First Quality Among Full-Flavored Cheeses

At the Central Experimental Farm, Ottawa, after a great deal of experimental work, a new cheese has been originated. It is termed Meilleur cheese, being named after the dairyman at the farm—Joseph Meilleur. While the process of manufacture cannot as yet be considered to have been perfected, states a pamphlet just issued describing the methods of making, the nature, and the qualities of the new cheese, the results that have been obtained indicate a product of the first quality among full-flavored cheeses. The pamphlet describes the cheese as presenting, when properly ripened, an attractive bright yellow color and possessing a fine texture. It is more open than Cheddar, resembling to some extent the Emmentaler or "Swiss-hole" cheese. The characteristic odor and flavor, while being more or less pronounced, are not sufficiently marked to be objectionable, differing materially from the respective from the great majority of cheeses of this class. It is considered that when conditions and circumstances are favorable, the manufacture of milk into Meilleur cheese will prove profitable.

Stock Kept Alive On Prickly Pears

South African Agricultural School Tries Interesting Experiment

Interesting experiments of grant importance to areas liable to severe drought were carried out recently by the Grootfontein School of Agriculture in South Africa to ascertain whether stock could be kept alive for lengthy periods on a ration of prickly pear leaves alone.

It was demonstrated that sheep, though the toll off in condition, could exist for 230 days solely on a diet of prickly pear, and when a small allowance of alfalfa was fed in addition after that period the sheep were able to go for 500 days without a drop of water, depending on the moisture from the prickly pear.

Japanese English

Here is a copy of traffic rule No. 2, said to be actually used by the street cars in Tokyo:

"When a passenger of the foot leave in sight, tootle the horn trumpet to him melodiously at first. If he still obstacles your passage, tootle with angry vigor."

Refreshes Weary Eyes

When Your Eyes Feel Dull and Heavy, Use Murine. It is the only Refreshing Eye Treatment. Murine is the only Eye Treatment. Murine is the only Eye Treatment. Murine is the only Eye Treatment.

Clay Products Industry May Be Established In The Near Future In Saskatchewan

The attention of those interested in Canadian raw materials for clay products industries in Canada has for many years been directed to the extensive clay belt known to extend over a wide area along the Weyburn branch of the Canadian Pacific Railway in Southern Saskatchewan.

Owing to the nature of the clays in this field and their convenient situation as regards transportation, it has frequently been predicted that Saskatchewan will eventually take up an important industrial position in the Dominion based on industries utilizing clays, coals and natural gas.

Data on the Saskatchewan clay deposits has until recently been somewhat general, but steps have lately been taken to acquire more specific knowledge of the various beds, their suitability for a variety of clay products, and accurate investigations have been made with the ultimate object of placing before those interested such information as may lead to practical development.

A course at ceramics was instituted at the University of Saskatchewan to ensure a staff of experts for the future industry, and a ceramic engineer as well as a wide practical as well as theoretical experience. Private prospecting has supplemented government efforts, and today reliable information on the Saskatchewan clay deposits is so extensive and at the same time so encouraging as to warrant the closest attention from manufacturers and investors.

So far the surveys carried out by the Province's Ceramic Engineer have resulted in concentrating attention on the deposits in the Redwin-Willows and Eastend-Ravenscrag districts, these surveys having disclosed in these territories very large deposits of commercial clays. There are present in the district clays of a wide range of physical properties which permit of close control in body mixtures. In the immediate vicinity of Eastend there are at least two large deposits, easy of inspection, from which not only tests have been made but many carloads shipped to Medicine Hat, Alberta, and manufactured into creditable and extensive lines of crockery and stoneware for the Eastern Canadian market.

In the Redwin-Willows district the clays have been found to be of the ball or semi-ball types burning nearly white. In some cases a creamy white burning clay was found much lighter than similar commercial clays of Great Britain and the United States.

These clays should form the basis for the manufacture of such lines as granite ware, floor and wall tile, insulators and similar ware where a white body is desired. There is also to be found in this district clays of the stoneware type as well as semi-refractories suitable for screw pipes, terra-cotta, enamelware and ordinary fire brick and stove linings. In the Eastend-Ravenscrag district the clays are of the earthenware and stoneware types, highly suited to the manufacture of Rockingham yellow ware and a wide range of stoneware, including china.

The establishment of an extensive clay products industry in the province of Saskatchewan in the not distant future, can be reasonably expected. Excellent clay deposits of every variety are available, with fine transportation facilities and in proximity to supplies of coal and other requisite materials for manufacture. These clays have been proven the equal of deposits anywhere, and exhaustive tests made in the ceramic laboratories of New York all gave eminently satisfactory results.

Saskatchewan is the logical home for such an industry in Canada. There is a constantly growing market for building material such as brick, tile and terra-cotta and great market possibilities for stoneware and even tableware. The province of Saskatchewan alone imports heavily of these commodities each year. The existing industry in Canada is totally inadequate to supplying domestic requirements, and in the last fiscal year the Dominion imported clay products to the extent of \$10,781,592 as well as clays of various kinds to the extent of \$672,782, and such importation is on the increase rather than otherwise. Certainly there is a splendid opportunity for the investment of capital in the clay-working industry in Saskatchewan.

THE EXPLANATION

Nature placed the growth-promoting "vitamins" in the oil of the cod-fish—this explains why

Scott's Emulsion

is so definite in its help to a child of any age. Latter-day science reveals that the "vitamins" are needful for normal growth.

Scott's Emulsion will help any child grow.

Scott & Bowne, Toronto, Ont.

Help You

Run the Ball

—bring home the bacon, collar the blue vase, carry the message to Garcia, etc.

LITTLE Raisins, full of energy and Liron, will put the pep into you that makes winning plays. Use vim like it in your business, too.

One hundred and forty-five calories of energizing nutriment in every little five-cent red box that you see.

Comes from fruit sugar in practically predigested form—luculent, the scientists call it—so it goes to work almost immediately. Rich in food-iron also.

Try these little raisins when you're hungry, lazy, tired or faint. See how they pick you up and set you on your toes.

Constipation Banished

A druggist says: "For nearly thirty years I have recommended the Extract of Roots, known as Mother Seigel's Curative Syrup, for arresting and permanently relieving constipation and indigestion. It is an old reliable remedy that never fails to do the work." 30 drops three times a day. Get the Genuine. 50c and \$1.00 bottles.

CROWN BRAND CORN SYRUP

makes a crowning sauce for Blanc Mange and Baked Apples and Puddings.

It is a pure and wholesome sweet—whether used for table syrup, sauce or candy-making.

See that you get "Crown Brand"

THE CANADA STARCH CO. LIMITED

IRMA TIMES

An independent newspaper published every Friday at Irma, Alberta, Canada, by The Times publishers. The Alberta Oil Gazette Irma, Alberta, Canada

IF YOU CAN'T CHEER UP, SHUT UP.

The above is the motto of the Edmonton Spring Show. It is to the point. People in general are down in the mouth and many are expressing in words and also in writing their pessimistic views. This does no good. It lowers the morale of the country as a whole and discourages enterprise of all kinds, and discourages men from doing that which lies before them. The effort even in doing small things seems useless. This state of mind is dangerous. Anything that can be said or done by the individual or body of men to put the soft pedal on this blue ruin and gone-to-the-dogs, talk is just what the country needs. It is applicable to every city, every town, every district. If you can't cheer up, shut up. The other fellow won't at least be inoculated with the germ of despair.

WANTS SPEED IN HANGING PICARELLO

In a recent editorial in the Edmonton Bulletin entitled "Juggling with Justice" in which it refers to the appeal case of Picarello and Mrs. Lassandra convicted of murder of Constable Lawson, that paper is quite upset because the death sentence has not already been carried out. It is not the business of the press to hang people nor cry for the blood of those who sit in the shadow of the gallows. If for any reason the evidence had not been properly given the jury, or if any doubt exists in the minds of one or more of the appeal judges, it is in keeping with British justice to give the accused a reprieve until these points have been decided by the highest court in the land.

It is significant to note that in a late edition of the same paper an item was featured of a man in the Eastern states who had been sentenced to life imprisonment and served five months for a crime that another recently confessed to have committed. If the death penalty had been imposed this man would no doubt have been hung long ago. Picarello and Lassandra will likely pay the penalty but let the ends of justice take their course.

LIQUOR TRADE FOR PROVINCE IS PROFITABLE

Handling of liquor for medicinal purposes by the province has turned over a profit of \$2,608,516.74 since the first investment of \$17,000 was made in the government stocks seven years ago. Of this amount \$1,941,760 has been paid over to the provincial treasurer, while another \$666,757 is represented in stocks on hand. Alberta last year only bought about \$6,000 worth of new liquor for the vendor's stores and sold liquor to the extent of \$1,624,808, this being the third largest year's turnover since the vendor's stores were opened.

RURAL CHAUTAUQUAS TO BE TRIED THIS SEASON

Agricultural Chautauquas are the latest form of development of the original camp meeting that brought the name Chautauqua into existence. Several communities in the province are holding agricultural Chautauquas this year, one at Monitor having fixed dates for March 22 and 23. Some of the speakers are being brought

CREAMERY WORKERS' SHORT COURSE

Over 30 creamery workers are registered at the short course now being held at the University at Edmonton under the auspices of the dairy branch of the department of agriculture and the university. The students are taking a keen interest in the course.

NOTICE TO READERS

We welcome correspondence every week from the following places: Fabian, Jarrow, Kinless, Coal Springs, Metropolitan, Batts, Echo, Ross, Lynd, Albert, Education Point, Orbindale, Alma Mater, Strawberry Plains, Sunny Brae, Clark Manor, Roseberry, Battle Heights, Avonlea, Paschendale, Zolodova, Saulteau, Manville and Hardisty or any other place in the district.

This will be published free of charge, unless relating to something at which money was made, in which case the article published becomes an advertisement.

IN THE LEGISLATURE

The budget of the government is being introduced on Tuesday of the coming week by Hon. Mr. Greenfield, the premier. The estimates will be ready for consideration by that time, the premier has announced.

The report of the special committee on the legality of the petition asking for the sale of beer in the province, accepted by the legislature on a division of 49 to 7. The committee reported that the petition conformed with the terms of the direct legislation act.

Hon. Mr. Greenfield has a resolution on the order paper urging that the provincial and federal governments cooperate to negotiate with the transcontinental railways for a freight rate that will place Alberta coal on the Ontario market in competition with American coal.

An act has been introduced by Hon. Mr. Brownlee to facilitate the borrowing of money by farmers for seed grain purposes. Under this act, money loaned by mortgages for seed grain in respect of land they already hold mortgages upon will form part of the debt secured by the original mortgage.

A bill amending the election act has been introduced by Mr. Davidson, member for Calgary. This provides for advanced polls in cities in the province three days previous to the regular election day, for the convenience of travelers and others who are compelled to be absent election day.

Other acts which have been introduced include one to amend the school act, by Mr. Baker; one to amend the insanity act, by Mr. Reid; one respecting private bird sanctuaries, by Mr. Smith; of Red Deer one to amend the bills of sale act, by Mr. Brownlee; and one to amend the mothers' pension act, by Mr. Brownlee.

During the week a resolution submitted by W. G. Johnston, Medicine Hat, was carried without dissent, and after a debate, urging completion of various projected railway branch lines in the province.

IS IT ANYBODY'S BUSINESS?

Is it anybody's business
If a gentleman should choose
To call upon a lady—
If the lady doesn't refuse?
Or, to speak a little plainer,
That the meaning all may know—
Is it anybody's business
If a lady has a beau?
Is it anybody's business
When that gentleman does call?
Or when he leaves the lady?
Or if he comes at all?
Or is it necessary
That the curtain should be drawn,
To save from further trouble
From outside lookers-on?
Is it anybody's business
But the lady's—if her beau
Rides out with other ladies
And doesn't let her know?
Is it anybody's business—
But the gentleman's—if he
Should accept another's escort
Where he doesn't chance to be?
If a person's on the sidewalk
Whether great or whether small,
Is it anybody's business
Where that person means to call?
And if you see a person,
As he's calling anywhere,
Is it anybody's business
What his business may be there?
The substance of our query
Simply stated would be this:
Is it anybody's business
What another's business is?
Or if it is, or if it isn't,
We would really like to know
For we're certain, if it isn't,
There are some who make it so.
If it is, we'll join the rabble
And act the noble part
Of the tattlers and defamers
Who through the public mart;
If it isn't, we'll act the teacher
Until each meddler learns
'T would be better in the future
He'd mind his own concerns.

Is it anybody's business
If a gentleman should choose
To call upon a lady—
If the lady doesn't refuse?
Or, to speak a little plainer,
That the meaning all may know—
Is it anybody's business
If a lady has a beau?
Is it anybody's business
When that gentleman does call?
Or when he leaves the lady?
Or if he comes at all?
Or is it necessary
That the curtain should be drawn,
To save from further trouble
From outside lookers-on?
Is it anybody's business
But the lady's—if her beau
Rides out with other ladies
And doesn't let her know?
Is it anybody's business—
But the gentleman's—if he
Should accept another's escort
Where he doesn't chance to be?
If a person's on the sidewalk
Whether great or whether small,
Is it anybody's business
Where that person means to call?
And if you see a person,
As he's calling anywhere,
Is it anybody's business
What his business may be there?
The substance of our query
Simply stated would be this:
Is it anybody's business
What another's business is?
Or if it is, or if it isn't,
We would really like to know
For we're certain, if it isn't,
There are some who make it so.
If it is, we'll join the rabble
And act the noble part
Of the tattlers and defamers
Who through the public mart;
If it isn't, we'll act the teacher
Until each meddler learns
'T would be better in the future
He'd mind his own concerns.

Irma, Alberta

OUR LEASING CLUB.

In a former issue we made the initial announcement of THE TIMES LEASING CLUB. Within twenty-four hours several of our local subscribers took advantage of this offer, and in less than a week applications started coming from outside points. The first lease to be secured for the Times Leasing Club is on Legal Sub-division 9 of Section 28, Tp. 45, Rge 9w4. This joins the lease on which the Irma Oil Development Co. intend drilling their first well. This lease lays just south of the C. N. R. tracks, west of Irma, and should be worth many times the total subscription received by the Times for the past year. We have several other promising leases in view which will be secured just as soon as the amount placed in the leasing fund will permit. Remember the time to secure oil leases is before the drills start in any certain location. To be able to secure close-in leases, in any of the new fields it is necessary to be prepared and act quick. We will endeavor to secure leases for this Club in all the promising fields in Alberta. With our knowledge of the oil development in Alberta and the facilities of securing advance information on proposed development, it seems hard to realize how any better combination can be secured than The Irma Times for one year and a free interest in Alberta's greatest natural resource. If your subscription is in arrears take advantage of this offer. If your subscription is paid in advance send along your subscription for another year and we will see that the time is extended on our books. If you have never subscribed, do so TO-DAY. Use the coupon on the back page of this paper. Use it To-day.

More or Less Funny

THE DUTCHMAN AND HIS DOG

A Hollander, addressing his dog, said: "You vos only a dog, but I wish I vos you. When you got mit your bed in, you shust turn round three times and lay down. Ven I haf to look up de place and vind up the cat and turn de clock out, and ondress myself. Den my wife she vake up and scolds and de baby vakes up and cries, den I haf to walk him mit der house around, den maybe vee I get myself to bed it is time to get up again.

"Ven you get up, you shust stretch yourself, dig your neck a little and you vos up. I haf to light de fire, put on de kiddle, scrap some mit my wife already, and get my breakfast. You play around all day and haf plenty of fun. I haf to work all day and haf plenty of drubble and ven you die you was dead, but ven I die I haf to go to hell yet.

JUST PULLING TITS

Aye bane farmin' in Alberta. For mare as sixteen yare; Aya raise some wheat and corn And fat some hogs and steer; Aya watch dat farrier business Close for where da money gits And aye find it komin' kwickest When you are pulling tits. Dam falla what bane raisin' grains And haulin' dam to town, Him got no money in da pocket— Him broke the whole yare round. Dam falla what bane fatten stock Bane rich and den he lane poor: Sometimes him plenty money make Sometimes him losing more. But dam falla with the brindle cow, Him got bully tang you bet. Him never lose whole yares crop If ground bane dry or get too wet Van hail bane striking down the crop And just raisin' fits At nights him call dam brindle cow in.

And just bane pulling tits. Him got dam separator What makes a lot of cream Him got money comin' in Yust like a pleasant dream Him got a money in da bank Him got a money in his mitts Him bane no Rockefeller— He's yust bane pulling tits.—OLE

A local mother was urging upon her son the necessity of washing his face. "Why, mother," he said, "do I have to wash my face?" "Yes," she answered. "But why can't I just powder it like you do?" he asked.

Saturday. Gophers have been seen by several in this neighborhood. Here's hoping spring will soon be here. No blue birds have arrived as yet. J. B. Hon will be home for the Easter holidays. Pete Harvey's family have all been

sick with the flu but are all better now. Mr. Rob Dawson is home again. He has been away working. Last Friday was a bad evening not many out at Literary. But don't forget to come Friday the 30th and hear a good program.

Little Albert George Hopkins who has been sick is much better. Mr. and Mrs. Hopkins sail for England the 6th of April from St. John. We are sorry to lose these good citizens but the whole community wishes them all good luck and hope Mrs. Hopkins' health will be better there.

RICH IN VITAMINES

MAKE PERFECT BREAD

WORLD HAPPENINGS BRIEFLY TOLD

Work has started at Vancouver on the new 500,000 bushel grain elevator. Out of the 12,594,582 children between 10 and 15 years of age in the U.S., 1,060,855, or one in every 12, are at work.

Said to have been the oldest man in the Eastern Townships, Elieon Bonen, 107 years old, died at St. Hyacinthe, Que. His youngest son is 79.

The French Ministry of Labor publishes figures showing that generally the cost of living in France is now three times as much as in 1914.

The British Columbia Government's \$2,500,000 job of reclaiming and opening to settlement the rich lake-bottom lands of Sumas, in the Fraser Valley, over an area of five to 14 miles, will be completed by May 1.

The title of "royal" has been conferred by the King upon the Canadian Air Force, according to an announcement by the Department of National Defence. This service will according to be known in future as the Royal Canadian Air Force.

The Frankfurter Zeitung states that in 1922 Germany delivered to Jugoslavia on account of reparations 3,282 closed railway trucks, 150 oil cylinders, 2 complete railway workshops and 531 normal-gauge and 29 narrow-gauge locomotives.

Internally and Externally it is Good.—The crowning property of Dr. Thomas' Electric Oil is that it can be used internally for many complaints as well as externally. For sore throat, croup, whooping cough, pains in the chest, colic and many kindred ailments it has qualities that are unsurpassed. A bottle of it costs little and there is no loss in always having it at hand.

Big Oil Refinery.—The \$2,500,000 refinery of the Imperial Oil, Limited, which is under construction in Calgary, will be in operation by the end of 1923, according to a reported statement by C. O. Stillman, President of the concern.

More Irrigated Land

Large Area of Irrigated Land Will be Added this Spring

Water will be available in the spring on two of the irrigation projects in Southern Alberta, namely the Lethbridge Northern and the United, according to the annual report of the Irrigation Council of the province of Alberta. Considerable work is now being done towards colonizing the surplus lands in these districts. A total of 40,000 acres of land has been listed at prices ranging from \$15 to \$50 an acre. The council has a mailing list of 8,000 in its colonization work, and have already received more than 400 inquiries for land. Twenty prospective settlers have been shown over the projects.

Relieved after Nine Years of Suffering

Manitoba Man Finds Secret of Health in Dodd's Kidney Pills

Mr. P. R. Boissoneau wants Everyone to Know what Benefit he Received from Dodd's Kidney Pills. La Broquerie, Man. (Special).—"Before taking Dodd's Kidney Pills I was not able to work or sleep and now I am completely relieved of my kidney trouble." These are the words of Mr. P. R. Boissoneau, well-known and highly respected here.

"I have suffered for nine years and tried all kinds of remedies. It was Dodd's Kidney Pills that restored me to good health. I am now able to get about on the farm, have a good appetite and sleep well."

Dodd's Kidney Pills strengthen the kidneys and put them in shape to do their full work of straining the impurities out of the blood. With pure blood there is good health all over the body.

If you have not used Dodd's Kidney Pills for kidney trouble ask your neighbors about them.

Gold Smuggled in Soap

Shopkeeper Bought Valuable Shipment at Auction

Gold has been so scarce in Austria that all sorts of devices have been tried to get the precious metal into that country, the latest being smuggling it in soap. How the project failed is told in the following incident:

A widow in Budapest, after purchasing a cake of soap from a little shop nearby, began to rub the garments in her tub. After a time she came to a surprisingly hard centre—a gold crown piece.

Without delay she returned to the shop and purchased more cakes of the wonderful soap. Every one yielded a gold piece.

She organized a pool among her neighbors with the idea of clearing the shop of that particular brand of soap. But the secret was out. The police arrived and confiscated the stock.

It was discovered that originally the consignment had been dispatched from Budapest to a merchant in Vienna. An error had occurred in the bill of lading. The soap, put off at a wayside station, was unclaimed and finally auctioned.

The entire shipment, worth \$200,000, had been bought for a trifling sum by the shopkeeper.

Many Foreigners Naturalized

Men of every nationality secured status of citizens of Canada during the fiscal year ending March 31, 1922. Altogether 10,260 foreigners were naturalized. Americans with 2,266 and Russians with 2,060, led in the number of persons who became naturalized Canadians.

Constipation and Sluggish Liver

Don't take chances. Get Carter's Little Liver Pills right now. They never fail to make the liver do its duty. They relieve constipation, banish indigestion, drive out biliousness, stop dizziness, clear the complexion, put a healthy glow on the cheek and sparkle in the eye. Be sure and get the genuine.

Small Pill—Small Dose—Small Price

Canada Broadening Out

Limitless Possibilities of the Dominion Becoming More Generally Known

There is no thin strip of Ontario and Quebec separated by a desolate waste from the prairies. No longer are the prairies a narrow ribbon of land separated from British Columbia by mountains so high that freight cannot be carried over them. Instead we have Quebec pushing its settlements up the northern valleys and its industries into Labrador; Ontario extending local railways to the waters of Hudson Bay, and finding gold and silver mines on the way, at the same time creating a new Ontario towards Manitoba.

Manitoba, towards Manitoba. Prairie lands available for culture are two or three times the breadth north and south that the despairing critics of other days supposed. British Columbia, more than any of the other provinces, is finding wealth in her northland. Farming, fishing, lumbering and mining are working their way north. In this province, in Alberta, in Manitoba, and in Ontario the cry for railways comes mainly from the north.—Vancouver Province.

HAD BAD PAINS IN HER HEART

Nerves Were Very Bad

Mrs. John Case, R. R. No. 4, St. Catharines, Ont., writes:—"I wish to say that I have been bothered very much with my heart and nerves. I doctored with two different doctors, but did not find much relief. I would have such bad pains in my heart, at times, I would be almost afraid to move or breathe, and at night I could not sleep. If the pains in my heart were gone, my nerves would be so bad I could not lie still and would have a little sleep by being tired out. My stomach was also very bad and I could eat but very little, and then only certain things or I would have so much distress which always made by heart worse."

I had been suffering for nearly two years until the day I was talking to our druggist about the way I felt. He advised me to give Milburn's Heart and Nerve Pills a fair trial. I have now taken five boxes and am feeling so much better. I am able to do my own work, and can eat anything I wish. I cannot praise

MILBURN'S HEART AND NERVE PILLS

too highly. Price 50c a box at all dealers or mailed direct on receipt of price by The T. Milburn Co., Limited, Toronto, Ont.

It is asserted that the existence of cancer and tuberculosis in large numbers has been definitely established, and that these discoveries may direct the attention of investigators of these diseases to the earlier forms of life that still exist in the sea.

A Marvellous Instrument

Machine Gives Record on Chart of Strains in Steel

To the lay-mind it might seem impossible to devise any means of measuring microscopic strains in steel and other materials. There have been, however, various instruments designed in Great Britain to record strains of the most minute character—mere tremors in the material. A notable improvement in this field has recently been introduced by a leading British firm—their machine, unlike earlier types, giving a direct record on a chart of the strains and not depending upon photographs. The mechanism is driven by a clock movement, and does not need any battery or electric lamp. So sensitive is the instrument that it will register vibrations taking place at over one thousand times per second. Records are made by a pen on a tape and are examined under a simple microscope. The chief use for this instrument is in measuring the various stresses which arise in bridges when trains are crossing at various speeds.

Increase in Building

Figures recently issued by the Canadian Government Bureau of Statistics show that building permits to the value of \$3,765,256 were issued in Canada during January, of this year, an increase of \$772,231 compared with January, 1922, or 35 per cent. It is expected that there will be great activity in the building trades throughout Canada during the present year.

WINTER HARD ON BABY

The winter season is a hard one on the baby. He is more or less confined to stuffy, badly ventilated rooms. It is so often stormy that the mother does not get him out in the fresh air as often as she should. He catches colds, catches his little system, his stomach and bowels get out of order and he becomes peevish and cross. To guard against this the mother should keep a box of Baby's Own Tablets in the house. They regulate the stomach and bowels and break up colds. The mother can get medicine dealers or by mail at 25 cents a box from The Dr. Williams Medicine Co., Brockville, Ont.

Postal Air Routes

Stefansson Predicts Mail Delivery in Arctic by Airplane

The post office department announced a short time ago that a regular mail service will be opened between Fort McMurray, in Northern Alberta, and Akivik, on the delta of the Mackenzie River, the Canadian Arctic's newest post office and trading center. The mails will be carried by five relays of huskies in sleighs, and the postman will be two months in the wilderness each time he makes the trip. It will sleep under the canopy of heaven, surrounded by his dogs. By day he will march across the white spaces in a manner that Jack London made famous. But even this last bit of romantic human enterprise is threatened. Mr. Stefansson has already mapped the Arctic with polar air routes which he says will come within a few years. The world moves on.—Winnipeg Tribune.

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these powders are used.

Wolf Dogs For Movies

Forty "huskies," or wolf dogs, passed through Edmonton recently on their way to Banff, Alberta, where they will be used by an American motion picture producing company in the filming of a number of northern pictures.

Dye Faded Wrap, Skirt, Dress In Diamond Dyes

Each package of "Diamond Dyes" contains directions so simple any woman can dye or tint her old worn, faded things new. Even if she has never dyed before, she can put a rich, fadeless color into shabby skirts, dresses, waists, coats, stockings, sweaters, coverings, draperies, hangings, everything. Buy Diamond Dyes—no other kind—then perfect home dyeing is guaranteed. Just tell your druggist whether the material you wish to dye is wool or silk, or whether it is linen, cotton, or mixed goods. Diamond Dyes never streak, spot, fade, or run.

Monster Sawfish Caught

A sawfish, weighing two and one-quarter tons has recently been caught in the Bay of Panama. The fish was twenty-nine feet long, and had a girth of nineteen feet.

Power From Sun's Rays

New York College Graduate Demonstrates Miniature Engine

A miniature engine, whose power was generated by the sun's rays, was successfully demonstrated in the laboratory of the college of the city of New York by Bernard Grossman, a graduate.

A paraboloid-copper mirror caught and focused the rays upon a test tube of water, the heat causing steam, which in turn operated the tiny motor at a high rate of speed.

Grossman said his invention could be used in office buildings to provide light, heat and power, while the sun motor could be utilized to operate motor trucks. He will build a larger model to prove his theory.

CATARRHAL DEAFNESS

Greatly relieved by constitutional treatment. HALL'S CATARRH MEDICINE is a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced, your hearing may be destroyed forever. HALL'S CATARRH MEDICINE acts through the blood on the mucous surfaces of the system, thus reducing the inflammation and assisting Nature in restoring normal conditions. Circulars free. All Druggists. F. J. Cheney & Co., Toledo, Ohio.

Flour Mills Cannot Supply Demand

Large export orders of flour are being received by the Medicine Hat milling companies from the Orient and the United Kingdom, to which markets large shipments have been made during the past few months. All mills are running to capacity, and practically all report that they are unable to supply the demands for low grade flours.

Doctors Plan "Black List"

Doctors in London are suggesting a "black list" of patients who go from one medical man to another instead of paying their bills.

"There's a Reason"

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contains directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

Handy "Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade mark registered in Canada of Bayer Manufacturing of Monoclonal and other products. While it is well known that Aspirin means Bayer manufacture, to assist the public against imitations, the Tablets of Bayer Company will be stamped with their general trade mark, the "Bayer Cross."

FREE

**Greatest Opportunity Ever Offered
to Secure Interest in Alberta's
Leading Oil Fields**

ABSOLUTELY FREE

**PROBABLY YOU HAVE NOT REALIZED THE WON-
DERFUL CHANCES FOR INDEPENDENT FOR-
TUNES TO THOSE WHO SECURE HOLD-
INGS IN ADVANCE IN NEW OIL
FIELDS.**

For several years we have watched the movements of Big Interests, in their endeavour to secure supremacy in this our greatest natural resource. These companies have been quietly working over all parts of Alberta, and have secured valuable information, which leads us to believe that Alberta will soon be the Leading Oil Producing country of the Continent.

We are forming the TIMES LEASING CLUB and through this we hope to give all our subscribers a chance to obtain an interest in what we believe will soon be Alberta's Greatest Wealth Producing Industry.

You may obtain an interest in the Times Leasing Club, absolutely FREE by subscribing to the Irma Times for One Year at \$2.00 per year in Canada, or \$2.50 to the foreign countries.

For a Limited time the Times will place in trust one dollar of each yearly subscription, for procuring leases for petroleum and natural gas rights from the Dominion Government and for furthering the interests of the Club. The Times will retain an undivided half interest in all leases and will assist in every way to benefit the members of this Club.

The membership in the Times Leasing Club may be worth many, many times the amount of your subscription in the very near future.

Once a member of the Club, always a member.

There are no dues, no assessments, no obligations of any kind. A trust to be handled for the benefit of members.

The Times Leasing Club will not confine its holdings to any one field, but will endeavour to secure them in all probable oil producing areas.

Can you imagine what a pay-off will mean if oil is found on or near one of our leases.

DON'T MISS This OPPORTUNITY

More interest is being manifest. More hopes are being born for the oil fields of Alberta.

What will happen as the drills go deeper? As soon as the oil is found in commercial quantities near our leases this opportunity will be gone for ever.

YOU CAN READ —

Of the trend of development in the columns of the Times that will come to you each week for one year.

YOU CAN WATCH —

For the news that will come of the wells being drilled near your OWN HOLDINGS.

SUCCESS of the TIMES LEASING CLUB would mean supreme achievement for Irma Times.

Join Now before it is Too LATE. Use the Attached Coupon.

**IRMA TIMES,
IRMA, ALBERTA.**

Gentlemen:—

Attached find \$2.00 (\$2.50 for foreign countries) as payment for one year's subscription to the Irma Times, the Alberta Oil Gazette. It is understood that with this subscription I am to receive one free interest in the Times Leasing Club, and that I am to receive in accordance with this interest in all the future benefits of the Club.

Reduced fares will be authorized by the Canadian National Railways for Spring Live Stock Show, Edmonton, April 9th to 14th, inclusive, as follows:—

Tickets will be on sale April 7th to 14th inclusive, at single fare and one-third for round trip, from all stations in the Province of Alberta. Return limit April 17th.

Tickets will not be sold on last date of sale for trains arriving Edmonton later than 2:00 p.m. For further information apply to local agent of Canadian National Railways.

Farmers CAN HELP Colonization

IN CONNECTION WITH THE IMMIGRATION CAMPAIGN BEING CARRIED ON OVERSEAS

Canadian National Railways

Industrial & Resources Department

WILL RECEIVE APPLICATIONS FROM FARMERS PREPARED TO ENGAGE FARM HELP (MALE OR FEMALE, FOR A PERIOD OF ONE YEAR AT RATES OF WAGES CURRENT AT TIME OF ENGAGEMENT

Farmers are to make application on a form that may be obtained from C. N. R. Station Agents. C.N.E. representatives overseas will endeavour to secure the class of help required in Great Britain, Belgium, Switzerland, Denmark, Holland, Norway & Sweden. The Governments of these countries stand ready to assist this class of their people to emigrate to Canada, but feel that they should be assured of employment for at least one year in order to gain sufficient Canadian farming experience to fit them for going on farms of their own. Farmers who are able to do so, can thus assist in colonization work by engaging help by the year. There will be no charge to the farmer for our service, nor will the farmer be required to make any cash advance for the travelling expenses of his help to the nearest railway station. The information necessarily asked for in these application forms, which will be held in strictest confidence, includes: the kind of help required—male or female—married or unmarried; date required and for how long; nationality desired; monthly wages offered; kind of work offered, etc.
